

Lost? Press `SPC` and wait to reveal any menu, or `SPC h b b` to search every binding live.

DAILY LOOP journal `SPC n j j` → plan `SPC o a a` → open project `SPC p p` → code `gd` `K` + `TAB` accept AI → ask Claude `SPC l e` / agent `C-c c c` → run `SPC d d` → commit `SPC g g` + `C-c i`

DISCOVER & SURVIVE	
<code>SPC</code>	wait → which-key shows all
<code>SPC h k</code>	describe a key
<code>SPC h f</code>	describe a function
<code>SPC h b b</code>	search all bindings
<code>SPC h r r</code>	reload config
<code>C-z</code>	toggle vim / emacs state
<code>SPC q q</code>	quit Emacs

MODES evil	
<code>i a</code>	insert before / after cursor
<code>o O</code>	open line below / above
<code>I A</code>	insert at line start / end
<code>ESC</code>	back to normal mode
<code>v V</code> <code>C-v</code>	visual char / line / block
<code>u</code> <code>C-r</code>	undo / redo
<code>.</code>	repeat last change

MOVE	
<code>h j k l</code>	left down up right
<code>w b e</code>	word fwd / back / end
<code>0 ^ \$</code>	line start / first / end
<code>gg G</code>	buffer top / bottom
<code>C-d</code> <code>C-u</code>	half page down / up
<code>{ }</code>	prev / next paragraph
<code>5 k</code>	jump N lines (relative #s)
<code>/ n N</code>	search / next / prev

EDIT	
<code>x</code>	delete char
<code>dd yy p</code>	cut line / yank / paste
<code>ciw diw</code>	change / delete inner word
<code>cw dw</code>	change / delete to word end
<code>>> <<</code>	indent / dedent
<code>gc</code>	comment (motion or <code>gcc</code> line)
<code>r J</code>	replace char / join lines

FILES & BUFFERS	
<code>SPC .</code>	find file (here)
<code>SPC f r</code>	recent files
<code>SPC f s</code>	save
<code>SPC f P</code>	open Doom config
<code>SPC b b</code>	switch buffer
<code>SPC b d</code>	kill buffer
<code>SPC b n / p</code>	next / prev buffer

PROJECT & SEARCH	
<code>SPC p p</code>	switch project
<code>SPC p f</code>	find file in project
<code>SPC /</code>	search project (ripgrep)
<code>C-c s l</code>	search lines in buffer
<code>C-c s p</code>	ripgrep
<code>C-c s b</code>	switch buffer (consult)
<code>SPC s i</code>	symbols in file (imenu)
<code>C-c .</code>	embark act on thing at point

WINDOWS & WORKSPACES	
<code>SPC w v / s</code>	split right / below
<code>SPC w c</code>	close window
<code>C-w hjkL</code>	move between windows
<code>SPC w o</code>	maximize this window
<code>SPC w =</code>	balance windows
<code>SPC TAB n</code>	new workspace
<code>SPC TAB] [</code>	next / prev workspace
<code>SPC TAB r d</code>	rename / delete workspace

CODE & LSP	
<code>g d</code>	jump to definition
<code>g r</code>	find references
<code>K</code>	hover docs at point
<code>SPC c r</code>	rename symbol
<code>SPC c f</code>	format buffer
<code>SPC c I e</code>	list all errors
<code>] e / [e</code>	next / prev error
<code>SPC c I h</code>	who calls this (hierarchy)
<code>SPC c I T</code>	git time machine

DEBUG SPC d	
<code>SPC d d</code>	debug this file
<code>SPC d b</code>	toggle breakpoint
<code>SPC d n / i / o</code>	step over / in / out
<code>SPC d c</code>	continue
<code>SPC d e</code>	eval at point
<code>SPC d u l</code>	show locals (<code>u r</code> repl)
<code>SPC d x / r</code>	stop / restart

AI INLINE SPC i	
<code>SPC l e</code>	explain selection
<code>SPC l k</code>	rewrite w/ prompt (Cmd+K)
<code>SPC l r / f</code>	refactor / fix bugs
<code>SPC l o / d</code>	optimize / docstrings
<code>SPC l y / t</code>	type hints / write tests
<code>SPC l c</code>	chat (gptel)
<code>TAB</code>	accept ghost text typing
<code>C-TAB</code>	accept line (<code>M-n</code> cycle)

TALK TO CLAUDE	
<code>C-c c c</code>	start / toggle session
<code>C-c C-'</code>	Claude Code menu
<code>C-c c p</code>	send a prompt
<code>C-c c @</code>	insert @file mention
<code>C-c c r / k</code>	resume / continue
<code>C-c c s</code>	list / switch sessions
<code>C-c c n</code>	new named instance
<code>C-c c a</code>	usage / analytics

PLAN & ORG org	
<code>SPC X</code>	capture (t n r j p)
<code>SPC X j</code>	journal capture
<code>SPC o a a</code>	agenda (<code>o a d</code> dashboard)
<code>TAB</code>	fold / unfold heading
<code>M-RET</code>	new heading / item
<code>SPC m t</code>	cycle TODO state
<code>SPC m d / s</code>	deadline / schedule
<code>SPC m r</code>	refile to project

JOURNAL & NOTES	
<code>SPC n j j</code>	today's journal entry
<code>SPC n j n / p</code>	next / prev day
<code>SPC n j s</code>	search journal
<code>SPC n r f</code>	find / create roam note
<code>SPC n r i</code>	insert note link
<code>SPC n g</code>	roam graph
<code>SPC n b b</code>	insert citation
<code>SPC t y</code>	writing theme (prose)

GIT Magit	
<code>SPC g g</code>	status (the hub)
<code>s u</code>	stage / unstage (in status)
<code>c c</code>	commit
<code>C-c i</code>	AI commit message
<code>P p / F u</code>	push / pull
<code>b b / b c</code>	checkout / new branch
<code>l l / z z</code>	log / stash

THEMES & MISC SPC t	
<code>SPC t T</code>	switch code theme (live)
<code>SPC t L</code>	light / dark toggle
<code>SPC t y</code>	writing (Typora) theme
<code>SPC t z / o</code>	zen / centered writing
<code>SPC o t</code>	terminal (vterm)
<code>SPC o w</code>	browser in Emacs
<code>SPC o p</code>	file tree sidebar
<code>C-c H</code>	on-screen cheat sheet
